

```
graph TD; A[Async tile dataset: Get raw tiles] --> B[Concurrent queue: Pop all elements]; B --> C[RawTile];
```

RawTile

The diagram illustrates a data processing pipeline. At the top, three overlapping light purple rectangles represent raw tiles, with the front-most one labeled 'RawTile'. A black arrow points upwards from a central gray box to the 'RawTile' box. Below the central gray box, another black arrow points downwards to a light gray rounded rectangle labeled 'Concurrent queue: Pop all elements'. The central gray box is labeled 'Async tile dataset: Get raw tiles'.

Async tile dataset: Get raw tiles

Concurrent queue:
Pop all elements
